# Spiderweb Vase

## What You'll Need:

- 7¼" Glass Cylinder Vase
- White Tissue Paper
- Craft Glue
- Foam Paint Brush
- Glitter
- Spiderweb Stencil
- LED Tealight Candles
- Glow Sticks

## Easy Step-by-Step Directions:

1. Tear white tissue paper into small 2" pieces.

2. Using a foam paint brush and craft glue, spread a thin layer of glue on the vase (working in small sections so you don't glue yourself to the vase!). Stick the pieces of tissue paper onto the glue, allowing them to overlap a little. Then, dip the foam brush in glue and spread some more glue on top of the tissue, working carefully so as not to tear the tissue. Repeat these steps until your vase is covered in a layer of white tissue paper. Set aside to dry.

3. Once the vase is completely dry, place the spiderweb stencil (see next page) inside the vase and trace over the lines from the outside of the vase with craft glue. Sprinkle glitter (in your choice of color) over the glue, covering it completely. Working in small sections will make the tracing process easier. Be sure to work over a plate so you can catch and reuse the excess glitter. If you want the web design on both sides of the vase, simply reposition the stencil and keep tracing with glue and sprinkling with glitter until you've covered the entire vase or reached your desired eerie effect. Set vase aside to dry.

4. Once the glitter and glue are completely dry, carefully brush off the excess glitter with a dry paint brush. Place LED tealight candles or glow sticks inside the vase for a spooky effect!

Spiderweb Stencil
