wedding idea project sheet

Giant Tissue Paper Flower Decorations

What You'll Need:

- 20x20" Tissue Paper (your choice of colors)
- Floral Wire
- Scissors

Easy Step-by-Step Directions:

1. Layer 8-10 sheets of 20x20" tissue paper on top of one another. For a greater impact, you can mix two (or more) colors together.
2. Fold the tissue paper in 1-1½ sections, back and forth in an accordion/fan fold.
3. Once folded, secure the tissue by twisting floral wire around the middle.
4. For prettier "petals", trim each end of the tissue into rounded or pointed corners. For a more dahlia-looking style of flower, cut a small slit (about 1" deep) in the middle of the rounded edges.
5. Now you are ready to open your flower. Carefully (so you don't tear the tissue) separate the tissue layers on the left and right side towards the center.
6. Once you have separated all the tissue layers, fluff and shape your flower to your desired look.
7. The finished flowers can be hung from the ceiling or light fixtures using fishing wire, or attach them to dowel rods for stems and arrange in a vase. You can also attach the flowers to chairs, railing, trees, and bushes using the attached floral wire.

your wedding should be special... *not expensive!*
